

Anti-Dog Group Set Up.

This notice is to inform local residents that a 'group' has been set up with no greater objectives other than to deprive a couple of pensioners of their dogs. One of those involved have even gone so far as to have stood outside their gates, complete with dog and recording equipment, goading their dogs into barking in order to gather 'evidence' that could then be handed over to the authorities, while another said he'd 'give 'em a good kicking.' The animals in question although excitable are not aggressive and pose no threat to the passing public, all of which has been so wildly asserted by those who are both naive and ill-informed, those who actually want a problem where there is none to be had.

A chance encounter with a campaigner with access to around 200,000 email contacts may not have been one of their best moves but this nonetheless is what has happened. It seems they have such little going in their empty lives that these are the activities they will stoop to in order to give themselves sense of purpose. Idiocy and arrogance that really has to be seen to be believed.

A full list of postal addresses together with quotes will be given if as and when hostilities ever escalate.
