Proposal for next steps

These next steps, from our discussions in the GT, can be:

- a) a dialogue meeting between IC organizations interested in contributing to wsf 2021, and a group of global organizations and movements, which we are already preparing.
- b) a second expanded consultation meeting that will complement the listening started at the first expanded meeting on the WSF process, and which was already announced on June 27.
- c) preparatory stages for the realization of the next planetary edition towards Mexico in 2021. It seems to us that, in these stages, at the same time, the collective responsibility of the member entities of the IC on the format and timing of the process-event WSF 2021, must be manifested, and a cooperative framework should be proposed, - to be established at this next IC meeting in August - where consulted organizations that show interest in the fsm process can get included in two ways:
 - Contributing to “facilitate” this process together with IC organizations and the Mexican facilitating collective, recalling a specific goal stated at the CI meeting in Porto Alegre in January 2020: that the worldwide invitation to participate in the WSF 2021 event-process be signed by the widest possible list of organizations,
 - Actively participating in the WSF 2021 process according to their political goals and strategy, aiming at broad and active articulations, which consolidate the political content of the WSF 2021 process
